App J (RTC) SHELL (Submitted 24Oct16).docx

Hi Jeannie,

Ex. 5 - Deliberative Process

Attached is the latest SHELL, which has a bunch of modifications discussed last week.

For version control, I will on to the MASTER Shell.

EPA and New York State Announce Ban on Dumping Sewage from Boats into Long Island Sound

Sept. 6, 2011, NEW YORK, NY – The US Environmental Protection Agency and the New York State Department of Environmental Conservation today announced that a 760 square-mile area of Long Island Sound is now a "no discharge zone" which means that boats are completely banned from discharging sewage into the water. EPA reviewed DEC's proposal to establish a no discharge zone for New York areas of the Long Island Sound and determined that there are adequate facilities in the Sound for boats to pump out their sewage. Boaters must now dispose of their sewage at these specially-designated pump-out stations. This action is part of a joint EPA and New York State strategy to eliminate the discharge of sewage from boats into the state's waterways. Discharges of sewage from boats can contain harmful levels of pathogens and chemicals such as formaldehyde, phenols and chlorine, which have a negative impact on water quality, pose a risk to people's health and impair marine life. EPA reviewed numerous public comments on its tentative determination for the establishment of a no discharge zone which was proposed in April 2011.

3. Other edits: See below, with added responses in Red.

Bernward.
